

Measure Internet Censorship

Did you know?

Governments **blocked social media** (e.g. WhatsApp) during **elections** in Uganda, Tanzania, Mali, Benin, Togo, Burundi, Zambia, and many other countries in recent years.

What you can do?

- Run OONI Probe on Mobile or Desktop: <https://ooni.org/install>
- Enable **Automated testing** in the OONI Probe settings to contribute results every day!

! Heads-up!

Please **turn your VPN off** when running OONI Probe to help ensure more accurate test results.

Running OONI Probe **can potentially be risky** in certain countries.

Contribute evidence of Internet censorship

In real-time, your OONI Probe test results are published as open data.

This data will **support human rights advocacy efforts** defending your digital rights.

Founded in 2012, the Open Observatory of Network Interference (OONI) is a non-profit free software project documenting Internet censorship around the world.
